

## Who We Are

ProPower Resources is a **specialty technical staffing company** providing temporary project engineering and project management services to Generation Companies (GENCOS), major equipment/systems suppliers and architect/engineering firms serving the power industry. We focus on the highly **selective recruitment and supply of experts**, either individuals or complete teams, on a temporary basis, to support the power generation industry's initiatives for:

- Retrofit/Upgrade of solid fuel firing systems and steam generators
- New solid fuel generation capacity additions
- Retrofit/Upgrade of emission reduction systems for air emission compliance for existing units

## Bridging the Gap in Technical Staffing Services

ProPower provides the **smart and flexible alternative to permanent hires** for GENCOs, A&E's and major equipment/systems suppliers in the power industry. ProPower offers you the **flexibility** to use our highly qualified teams of technical experts on a contract basis for engineering, facility operations & maintenance, design, construction, technical and consulting services. We provide solid-fuel power industry experts, **under your supervision, at your preferred location and assignment duration** to meet your specific technical staffing needs. Our highly selective and rigorous selection procedure, ensures that our people will bring the level of expertise that you require in any stage of the project that will be effective immediately.

## Customer Segments

Our experts serve the following segments of the Power Industry:

- GENCOs
- Equipment Suppliers
- A&E Consultants
- Construction Firms

## Creating Value Through Expertise

ProPower delivers expertise. Our management brings over **50 years of power industry experience and the staffing capabilities**, enabling us to quickly identify, evaluate and deliver the right personnel, to achieve cost-effective results for you. This is made possible by the extensive commercial and technical industry

know-how of our team and network of experts, ready and available to add value to your engineering and operations organization. ProPower People have proven design and operations experience, and require little or no on-the-job training. Our ability to provide personnel for full design, engineering, procurement, project management and construction services allow us to support each project from an **integrated perspective**

## 'The Resource' for Job Seekers

ProPower is dedicated to matching Job Seekers' unique expertise to our clients' benefit, thus creating "win-win" assignments. Our goal is **to employ and fully utilize your unique skills and expertise in the most challenging and professionally rewarding assignments** year after year. We know how our clients' businesses operate, how their technologies work, and what their operating requirements are. We know the technical skill levels, experience requirements, and the functional qualifications necessary to successfully execute each project to our clients' complete satisfaction. If we select you for an assignment, be assured that the assignment will be technically challenging, professionally rewarding, and will further your career.

## Clients Overcome Technical Expertise Constraints

With ProPower, clients can plan for future initiatives, and respond quickly to opportunities **without the fixed overhead that accompanies traditional staffing**. ProPower gives you the expertise you need under your direct supervision, with the flexibility to meet your business growth objectives. Whether, you need individuals or complete teams on a temporary basis, ProPower is your resource for industry experts with proven design and operations experience. With ProPower, you can focus on your core business without spending valuable resources in personnel planning, optimization and utilization.
